ÉDITION PERSONNELLE

Le Livre Astral

Soléna

Ce livre est composé à partir de votre ciel de naissance. Il propose une lecture symbolique et personnelle, à confronter à votre expérience. Il ne prédit pas un avenir certain et ne remplace pas votre liberté de choix.

Préface

Soléna, ce livre vous invite à faire une pause et à regarder votre histoire sous un autre angle. Votre thème de naissance en est le point de départ : une carte singulière, composée pour un lieu et un instant précis.

Les pages qui suivent mettent en mots des contrastes, des élans et des besoins. Vous pourrez vous reconnaître dans certaines lectures, en discuter d'autres et laisser de côté ce qui ne vous parle pas. Vous restez la personne la mieux placée pour donner du sens à votre vécu.

Prenez le temps de lire, de noter vos réactions et de revenir sur un passage lorsque votre situation évolue. L'intention de ce livre est de soutenir cette attention à vous-même, avec nuance, curiosité et bienveillance.

Introduction — Comment lire votre thème

A gentle, honest reading of your sky.

Soléna, this book invites you to pause and look at your story from another angle. Your birth chart is its starting point: a singular map, composed for one precise place and moment.

The pages that follow put into words contrasts, impulses, and needs. You will recognize yourself in some readings, debate others, and set aside what doesn't speak to you. You remain the person best placed to make sense of your lived experience.

Take time to read, to note your reactions, and to return to a passage when your situation evolves. The intention of this book is to support that attention to yourself — with nuance, curiosity, and care.

Soléna's Sky

Your three signatures.

Sun : Gemini · Moon : Pisces · Ascendant : Libra

Your personal signature

Your Sun in Gemini illuminates a mobile, curious intelligence — you move through questions, through signs. The world draws you in its plurality.

Your Moon in Pisces inhabits another realm entirely. There, borders dissolve. You sense before understanding. You absorb moods, silences, the pains that aren't yours.

Your Ascendant in Libra offers a form of grace. It polishes angles, seeks the right accord, gives your presence an art of bond and measure.

Your Planets

Ten forces, ten colors.

Ten forces inhabit your sky. Each one lives in a sign, at a precise degree, and occupies a territory of your life — a house. This chapter introduces them one by one, in the order they weave your complexity.

Sun in Gemini · 24°08' · 9th house

Your Sun in Gemini lights up a mobile, lively intelligence, curious about every nuance. You move forward through questions, through signs, through echoes. The world attracts you in the plural, and you find deep joy in circling between ideas, beings, atmospheres.

You need air, movement, speech — that light freshness that keeps life from freezing. In the 9th house, this Sun pushes you toward horizons: books that open worlds, journeys that rearrange your inner map, teachers who come and go.

Moon in Pisces · 15°38' · 6th house

Your Moon in Pisces inhabits an entirely different realm. Here, the borders fade. You sense before you understand. You catch moods, silences, the pains that aren't yours but always find you.

This part of you dreams, absorbs, divines. It knows compassion, surrender, porosity — but it also knows the troubled tides, the nameless weariness, the sorrows that rise like groundwater.

Mercury in Gemini · 18°12′ · 9th house

Mercury in Gemini sharpens your thinking into something quick and multiple. You see several sides at once, you connect what others separate. Your speech travels light — you prefer the just word to the heavy one.

In writing, you dance. In conversation, you weave. You teach without lecturing, you understand without being told twice.

Venus in Cancer · 02°44' · 10th house

Venus in Cancer colors your way of loving with tender memory. You love what shelters, what nourishes, what comes back. Your tenderness is a home you build slowly, room by room.

You remember birthdays, scents, the exact tone of a laugh. Your love language is care — you say 'I love you' by cooking, by listening, by remembering.

Mars in Aries · 11°03' · 7th house

In you, momentum doesn't ask permission. It bursts like a match struck in one clean gesture, with the taste of beginning, of the decision made the moment you stop thinking. When something matters, your body knows it right away: the nape tenses, the legs accelerate, the voice cuts clearer.

This force doesn't live alone in a forest; it wakes up facing the other, in the living mirror of the bond. Encounters light you up, disagreements too, and love sometimes takes on the allure of a terrain where each wants to hold their line.

Pour poursuivre votre lecture

Choisissez une idée qui vous a touché et reliez-la à une situation concrète de votre vie. Qu'est-ce qu'elle vous aide à nommer ? Quelle autre explication pourriez-vous envisager ?

Notez une action simple à essayer cette semaine. Revenez ensuite à votre livre pour observer ce qui s'est éclairci, ce qui a changé et ce qui demande encore du temps.
